	about tass

Step 1 - Traditionally, if a user wanted SS/SSI benefit history data for a particular household, he/she would have to view the Benefit History report for the entire month and manually search for a specific household. The new SS/SSI system enables users to view and print benefit history reports for a particular household quickly and easily, based on the social security number of the head of the household.

Searching by Household

query by household

Head of Household SSN:

Select a Contract:

or

Select a Project:

View Available Reports

Reset

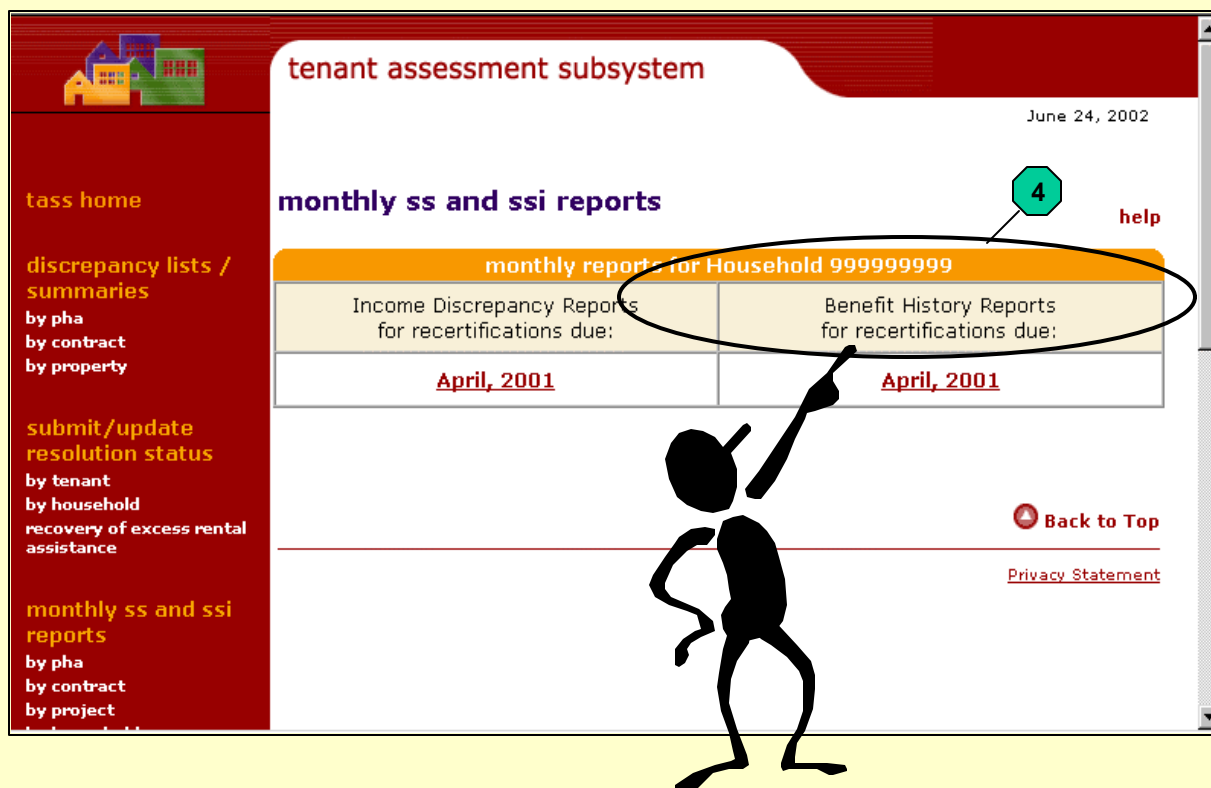

Back to Top

Just enter the Head of Household SSN and either the Contract or Project number.

- Step 2** - The “query by household” screen will appear as shown above. The user should enter the Head of Household social security number and one of the following – Contract Number or Project Number – to which the household belongs. *Note: Do not use hyphens (-) when entering social security numbers.*
- Step 3** - The user should then select the “View Available Reports” button. The list of monthly reports available for the household will be displayed. If the household does not belong to the user’s portfolio of households, or if no reports are available, an error message of “No reports available” will be displayed.

Monthly Reports for Household Screen

Step 4 - Once the list of available monthly reports is presented for the household, the user can select the report they wish to download by selecting the report's month and associated year.
